```

Login Admin

```
49
       handleSubmitAdmin = (e) => {
50
         e.preventDefault();
         const user = {
52
           type: "Admin",
           email: e.target.querySelector(`input[data-testid="admin-email-input"]`)
53
             .value, // data-testid was "employee-email-input"
           password: e.target.querySelector(
             `input[data-testid="admin-password-input"]`
           ).value, // data-testid was "employee-password-input"
           status: "connected",
60
         this.localStorage.setItem("user", JSON.stringify(user));
         this.login(user)
62
           .catch((err) => this.createUser(user))
           .then(() => {
64
             this.onNavigate(ROUTES PATH["Dashboard"]);
             this.PREVIOUS LOCATION = ROUTES PATH["Dashboard"];
             PREVIOUS LOCATION = this.PREVIOUS LOCATION;
             document.body.style.backgroundColor = "#fff";
           });
```

Check type of file Upload

```
handleChangeFile = (e) => {
 e.preventDefault();
 const errorMsg = document.querySelector("#errorMsg");
 errorMsg.style.display = "none";
 const fileInput = this.document.querySelector(`input[data-testid="file"]`);
 const file = fileInput.files[0];
 const fileName = file.name:
 this file = file:
 const extention = fileName.match(/\.([a-z]+)$/i)[1]; // Récupère l'extention de fichier
 if (!/(jpe?g|png)$/i.test(extention)) {
   // Regex qui compare pour s'assurer que file est bien jpeg, jpg ou png
   console.log(
      "Le fichier n'est pas au bon format ! Formats acceptés: jpeg, jpg, png"
   fileInput.value = ""; // Vide la value si extention de fichier ne convient pas pour empecher soumission form
   errorMsg.style.display = "block";
   else {
   this.fileName = fileName;
```

Admin unfolds multiple lists

```
161
162
          // bills.forEach((bill) => {
               $(`#open-bill${bill.id}`).click((e) => {
          // console.log("eventLitener attached");
              this.handleEditTicket(e, bill, bills);
          bills.forEach((bill) => {
169
            $(`#open-bill${bill.id}`) // Suppression des écouteurs d'événements déja en place pour éviter conflit
170
              .off("click")
171
              .on("click", (e) => {
172
                console.log("eventLitener attached");
173
174
                this.handleEditTicket(e, bill, bills);
175
              });
          3);
176
177
178
          return bills;
179
```
